- | | | | |
|--------------|--------------|-----------|--------|
| • JavaScript | • React | • MongoDB | • Git |
| • Node | • Redux | • SQL | • HTML |
| • Express | • PostgreSQL | • SEO | • CSS |

Projects

ESHOP | <http://bit.ly/eshop-1645>

Ecommerce app developed using react.js, mongo and express. This application features a PayPal integration, REST APIs and admin functionalities.

- Paypal integration at checkout.
- Utilized Redux for state management.

STOCK TRACKER | <http://bit.ly/stocktracker0102>

Web application developed using the PERN stack that helps investors keep track of their stock portfolio. Users can perform CRUD operations as well as access stock data, news and a dashboard.

- Utilized financial APIs to pull stock quotes and news data.

INSTACLONE | <http://bit.ly/instaclonereact251>

InstaClone is a simplified version of Instagram where users can post pictures, comment and like posts and follow each other. This application leverages react, redux, and node.js.

- Utilized Multer for image upload.
- Implemented backend user authentication using JWT.

Experience

Fit Small Business - Lead SEO Strategist

New York City, NY | Nov 2020 to Present

- Managed SEO projects in 4 topic teams improving overall search visibility by 21% for sales and marketing categories.
- Trained new team members on SEO strategies such as keyword research, onpage optimizations and topic clusters.
- Advised the team on tech SEO considering implications such as crawling, indexing, and website structure.

Fight Pandemics - Full Stack Developer Volunteer

New York City, NY | Aug 2020 to Oct 2020

- Collaborated with a team of 4 engineers to plan and implement the notification feature.
- Developed functions and triggers on MongoDB Stitch so notification collection would get automatically populated when new comments and likes were created.

Educational Background

The Web Developer Bootcamp by Colt Steele (2020)
